Step/Change Made	Description / Reason					
Removed duplicates	Ensured no repeated movies or shows					
Corrected missing values	Filled or removed empty/wrong entries					
Standardized formats	Made year, genre, and type consistent					
Organized data	Sorted and structured for analysis					
made Ready for analysis	Dataset is clean and usable					
Short Summary						
The dataset which i downloaded from kaggle didn't have Titles pf the movies and tv shows , so i found the title of movie and tv shows for the suitable genre and filled their name in the column. Then i applied formulas to check if any duplicate value is present in the dataset, removed duplicates and rechecked the data and also checked if all the information is upto the movie or tv show that is mentioned. i also matched the data as per all the rules provided to me in the task. Now the dataset is all clean and revised and it is ready to be used/analysed
